

Shelter-in-Place Training Program

Opening Exercise Multiple Improvised Explosive Devices

Exercise Message:

I just received this notification from local emergency management officials:

Two explosive devices have been detonated at separate locations in _____ *(insert location in vicinity of your site)* and there have been a number of casualties. Law enforcement officials have received word from a caller claiming “that many more bombs are in the area and will be detonated randomly.” Due to this very dangerous threat, public safety officials are recommending that everyone in the _____ *(insert area)* should shelter in place immediately. Duration of the shelter in place may be 12-24 hours or more. Stay tuned for more information as it becomes available.

Question for the Group:

Would this directive to shelter in place or stay put and not leave this building for any reason cause you any problems?

Discussion Session:

Take a moment now to write down any issues you would have in following this recommendation. Consider all aspects of your life and family as you think about your ability to follow the official warning.

- *Give the group a few minutes to write down any issues they would have.*
- *Then go around the room and get people’s responses.*
